About Me

Welcome to my corner of the digital realm! I'm Gigi Shalamberidze, a passionate web developer and creative web designer with 4 years experience. With a keen eye for aesthetics and a love for coding, I bring imagination to life through captivating websites.

My journey in the digital world started with a spark of curiosity. Armed with determination and a desire to learn, I set out on the path of programming. It all began 4 years ago with online tutorials and courses that introduced me to the fundamentals of HTML, CSS, and JavaScript. The online community became my classroom, providing the resources and support I needed to take my first steps into the world of coding.

My learning adventure was a mix of self-discovery and online guidance. Platforms like Codecademy, freeCodeCamp, and YouTube tutorials served as my mentors.The satisfaction of translating lines of code into functional web pages kept me engaged. As my skills grew, I explored more advanced concepts, embracing the power of libraries and frameworks like Vue.js and React.js. This hands-on approach not only solidified my understanding but also fueled my passion for crafting digital experiences

My journey into the digital world was not limited to programming, I was also intrigued by the intricacies of UI/UX design and decided to spend some time studying it. I started using Figma to bring my creative visions to life, building web pages of different types and complexity to sharpen my skills. All this made me a successful web designer and web developer.

Education

2020sep - Present

- **International Black Sea University**
  Computer Science

  I'm a motivated and committed computer science student who is now attending IBSU (International Black Sea University) in Georgia to further my education. I'm pleased to be a part of the dynamic and forward-thinking area of computer science, where I get to investigate the most recent innovations and developments influencing our environment. IBSU students enjoy the benefit of learning from knowledgeable instructors and interacting with a wide range of like-minded peers who are passionate about computer science. I'm developing a solid foundation in programming languages, algorithms, data structures, and software development processes through my courses.

2008sep - 2020aug

- **Gimnazia Oqrosakvani**
  Primary & Secondary Education

  My basic and secondary education was finished at Gimnazium, a prestigious Georgian institution. Academic success was prioritized at the school, creating a motivating and encouraging environment for pupils.

Experience

2020jan - present

- **Freelancer**
  Web Developer & Designer

  Currently, I work as a freelancer, providing web design and development services on platforms like Freelancer.com and Upwork. I collaborate with clients from diverse industries, offering a range of services from creating visually stunning websites to developing robust web applications. My expertise includes both frontend and backend development, allowing me to handle projects end-to-end. I focus on delivering high-quality, responsive designs and efficient, scalable solutions tailored to each client's needs. Working as a freelancer has enabled me to apply my skills to various challenging projects, continuously expanding my knowledge and experience in the field.

2024jan - 2024aug

- **Imperial Tours Company**
  Web Designer

  I worked as a web designer at Imperial Tours, a company dedicated to providing travelers with the best tours in Georgia. In this role, I was responsible for designing and developing the company's website, ensuring a visually appealing and user-friendly experience for visitors. I collaborated closely with the marketing and content teams to create engaging web pages that effectively showcased the company's tour offerings. My work involved crafting responsive designs, optimizing the site's usability, and maintaining brand consistency across all digital platforms. This position allowed me to contribute to the growth of the company's online presence and enhance the overall customer experience.

2023feb - 2023oct

- **Repair company Metrix**
  NextJs Developer

  As a Next.js developer at Metrix Repair Company, I was responsible for developing full-stack applications, combining both frontend and backend expertise. My role involved building and maintaining responsive, high-performance web applications using the Next.js framework. I worked on creating seamless user interfaces, integrating complex backend services, and ensuring a smooth user experience. In addition to developing new features, I focused on optimizing application performance and implementing best practices for security and scalability. My work at Metrix Repair Company enabled the delivery of efficient and user-friendly solutions, contributing significantly to the company's digital transformation efforts.

2022jan - 2023jan

- **Viptrade trading company**
  Front-end developer

  As a frontend developer at VIPTRADE, a trading company, I specialized in converting Figma designs into fully functional web interfaces using HTML, CSS, and JavaScript. My primary responsibilities included translating complex design mockups into responsive, interactive, and pixel-perfect web pages. I collaborated closely with designers to ensure that the visual aspects of the projects were accurately implemented while maintaining a focus on performance and usability. My work involved implementing modern frontend technologies and best practices, contributing to the development of user-friendly and visually appealing trading platforms. This role allowed me to play a key part in bringing the company's digital vision to life.
